CONTENTS OF VOLUME 49

NUMBER 1, PART 1, SEPTEMBER 1965

1 VILLEGAS, JORGE, VILLEGAS, LEOPOLDO, and VILLEGAS, RAIMUNDO. Sodium, potassium, and chloride concentrations in the Schwann cell and axon of the squid nerve fiber

9 BASKIN, R. J. The variation of muscle oxygen consumption with velocity of shortening

17 FERRONI, ARNALDO, and BLANCHI, DONATELLA. Maximum rate of depolarization of single muscle fiber in normal and low sodium solutions

27 VON BÉKÉSY, GEORG. Temperature coefficients of the electrical thresholds of taste sensations

37 BOZLER, EMIL. Osmotic properties of amphibian muscles

47 HOSKIN, F. C. G., and ROSENBERG, PHILIP. Penetration of sugars, steroids, amino acids, and other organic compounds into the interior of the squid giant axon

57 CARTER, MELVIN W., MATRONE, GENNARD, and METZLER, CARL. Estimation of the life span of red blood cells in the growing animal in different nutritional states

69 SLAYMAN, CLIFFORD L. Electrical properties of *Neurospora crassa*. Effects of external cations on the intracellular potential

93 SLAYMAN, CLIFFORD L. Electrical properties of *Neurospora crassa*. Respiration and the intracellular potential

117 JACOBSON, STUART L. Receptor response in Venus's fly-trap

131 BRIGGS, F. NORMAN, and FLEISHMAN, MARTIN. Calcium binding by particle-free supernatants of homogenates of skeletal muscle

151 BRUCE, DAVID L., and MARSHALL, JOHN M., JR. Some ionic and bioelectric properties of the ameba *Chaos chaos*

NUMBER 1, PART 2, SEPTEMBER 1965

LIST OF PARTICIPANTS

PREFACE HERBERT CHASIS

GENERAL INTRODUCTION ALFRED P. FISHMAN

Structure and Function of Oxygen

3 RITTENBERG, DAVID. Introduction

5 DOLE, MALCOLM. The natural history of oxygen

29 TAUBE, HENRY. Mechanisms of oxidation with oxgyen

51 Discussion

Oxygen-Transporting Pigments

55 FORSTER, ROBERT E. Introduction
57 WITTENBERG, JONATHAN B. Myoglobin-facilitated diffusion of oxygen
75 URNES, PETER. The crystal-solution problem of sperm whale myoglobin
105 ROUGHTON, F. J. W. The oxygen equilibrium of mammalian hemoglobin. Some old and new physicochemical studies
125 Discussion

Oxygen Consumption by the Cell

129 DOLE, VINCENT P. Introduction
131 NICHOLLS, PETER. Oxidation and peroxidation
149 BUTOW, RONALD A., and RACKER, EFRAIM. On the mechanism of respiratory control
163 CHANCE, BRITTON. Reaction of oxygen with the respiratory chain in cells and tissues
189 Discussion

Non-Hemoproteins and Oxygen

199 GRANICK, S. Introduction
201 GIBSON, QUENTIN H. Mechanisms of reaction of some flavoprotein enzymes with oxygen
213 FRIEDEN, EARL, OSAKI, SHIGEMASA, and KOBAYASHI, HIROSHI. Copper proteins and oxygen. Correlations between structure and function of the copper oxidases
253 GOLDFINE, HOWARD. The evolution of oxygen as a biosynthetic reagent
269 Discussion

275 INDEX

NUMBER 2, NOVEMBER 1965

181 BARR, CHARLES E. Na and K fluxes in *Nitella clavata*
199 HOLLAND, ROBERT A. B. Cell and solution velocity constants for the reaction CO + Hb → COHb at different temperatures in mammals with different red cell sizes
221 EPSTEIN, WOLFGANG, and SCHULTZ, STANLEY G. Cation transport in *Escherichia coli*. V. Regulation of cation content
235 VAN STEVENINCK, JOHNNY, and ROTHSTEIN, ASER. Sugar transport and metal binding in yeast
247 ERICKSON, ROBERT P., DOETSCH, GERNOT S., and MARSHALL, DAVID A. The gustatory neural response function
265 GOLDSMITH, TIMOTHY H. Do flies have a red receptor?
289 RUCK, PHILIP. The components of the visual system of a dragonfly
309 LEB, DANIEL E., EDWARDS, CHARLES, LINDLEY, BARRY D., and HOSHIKO, T. Interaction between the effects of inside and outside Na and K on bullfrog skin potential
321 NAKAMURA, YUTAKA, NAKAJIMA, SHIGEHIRO, and GRUNDFEST, HARRY. Anal-

ysis of spike electrogenesis and depolarizing K inactivation in electroplaques of *Electrophorus electricus* L.

351 LIEBERMAN, MELVYN, and PAES DE CARVALHO, ANTONIO. The electrophysiological organization of the embryonic chick heart

365 LIEBERMAN, MELVYN, and PAES DE CARVALHO, ANTONIO. The spread of excitation in the embryonic chick heart

381 LETTERS TO THE EDITOR

HUBBARD, RUTH, and KROPF, ALLEN. On the colors of visual pigment chromophores

NUMBER 3, JANUARY 1966

387 BASKIN, R. J., and PAOLINI, P. J. Muscle volume changes

405 ALPERN, MATHEW, and DUDLEY, DONICA. The blue arcs of the retina

423 ZIERLER, KENNETH L. Interpretation of tracer washout curves from a population of muscle fibers

433 ZIERLER, KENNETH L., ROGUS, ELLEN, and HAZLEWOOD, CARLTON F. Effect of insulin on potassium flux and water and electrolyte content of muscles from normal and from hypophysectomized rats

457 KENNEDY, DONALD, and EVOY, WILLIAM H. The distribution of pre- and postsynaptic inhibition at crustacean neuromuscular junctions

469 EPSTEIN, WOLFGANG, and SCHULTZ, STANLEY G. Cation transport in *Escherichia coli*. VI. K exchange

483 BRICKER, NEAL S., and KLAHR, SAULO. Effects of dinitrophenol and oligomycin on the coupling between anaerobic metabolism and anaerobic sodium transport by the isolated turtle bladder

501 LIPMAN, KENNETH M., DODELSON, ROBERT, and HAYS, RICHARD M. The surface charge of isolated toad bladder epithelial cells. Mobility, effect of pH and divalent ions

517 GIBBS, C. L., RICCHIUTI, N. V., and MOMMAERTS, W. F. H. M. Activation heat in frog sartorius muscle

537 THOMAS, J. J., JR., BAXTER, R. C., and FENN, W. O. Interactions of oxygen at high pressure and radiation in *Drosophila*

551 POOLE, RONALD J. The influence of the intracellular potential on potassium uptake by beetroot tissue

565 PINTER, R. B. Sinusoidal and delta function responses of visual cells of the *Limulus* eye

NUMBER 4, MARCH 1966

597 BIEDERMAN-THORSON, MARGUERITE. Source mechanisms for unit activity in isolated crayfish central nervous system

613 NAKAJIMA, SHIGEHIRO, and KUSANO, KIYOSHI. Behavior of delayed current under voltage clamp in the supramedullary neurons of puffer

629 NAKAJIMA, SHIGEHIRO. Analysis of K inactivation and TEA action in the supramedullary cells of puffer

641 PAGE, ERNEST, and STORM, S. R. Cat heart muscle in vitro. IX. Cell ion and water contents in anisosmolal solutions

655 KEDEM, ORA, and LEAF, ALEXANDER. The relation between salt and ionic transport coefficients

663 KELLER, K. H., and FRIEDLANDER, S. K. The steady-state transport of oxygen through hemoglobin solutions

681 KELLER, K. H., and FRIEDLANDER, S. K. Diffusivity measurements of human methemoglobin

689 LEE, KWANG S., LADINSKY, HERBERT, CHOI, SIN J., and KASUYA, Y. Studies on the in vitro interaction of electrical stimulation and Ca^{++} movement in sarcoplasmic reticulum

717 MAYHEW, E. Cellular electrophoretic mobility and the mitotic cycle

727 HOLLAND, R. A. B., and FORSTER, R. E. The effect of size of red cells on the kinetics of their oxygen uptake

743 WALLACH, STANLEY, REIZENSTEIN, DAVID L., and BELLAVIA, JOSEPHINE V. The cellular transport of calcium in rat liver

763 GOVINDJEE, and YANG, LOUISA. Structure of the red fluorescence band in chloroplasts

781 BRADY, ALLAN J., and TAN, S. T. The ionic dependence of cardiac excitability and contractility

793 HAGIWARA, SUSUMU, and NAKAJIMA, SHIGEHIRO. Differences in Na and Ca spikes as examined by application of tetrodotoxin, procaine, and manganese ions

807 HAGIWARA, SUSUMU, and NAKAJIMA, SHIGEHIRO. Effects of the intracellular Ca ion concentration upon the excitability of the muscle fiber membrane of a barnacle

819 LING, GILBERT NING, and OCHSENFELD, MARGARET MARY. Studies on ion accumulation in muscle cells

845 LETTERS TO THE EDITOR
COUTINHO, ELSIMAR METZKER. Calcium, magnesium, and local anesthesia

NUMBER 5, MAY 1966

849 SCHULTZ, STANLEY G., FUISZ, ROBERT E., and CURRAN, PETER F. Amino acid and sugar transport in rabbit ileum

867 SPERELAKIS, NICK, and LEHMKUHL, D. Ionic interconversion of pacemaker and nonpacemaker cultured chick heart cells

897 SCHANNE, OTTO, KAWATA, HIROSHI, SCHÄFER, BÄRBEL, and LAVALLÉE, MARC. A study on the electrical resistance of the frog sartorius muscle

913 LASANSKY, ARNALDO, and DE FISCH, FELISA W. Potential, current, and ionic fluxes across the isolated retinal pigment epithelium and choroid

925 CASTLE, EDWARD S. A kinetic model for adaptation and the light responses of *Phycomyces*

937 SANDOW, ALEXANDER, and ISAACSON, ALLEN. Topochemical factors in potentiation of contraction by heavy metal cations

963 MANTHEY, ARTHUR A. The effect of calcium on the desensitization of membrane receptors at the neuromuscular junction

977 TAKATA, M., MOORE, J. W., KAO, C. Y., and FUHRMAN, F. A. Blockage of

sodium conductance increase in lobster giant axon by tarichatoxin (tetrodotoxin)

989 FITZHUGH, RICHARD. Theoretical effect of temperature on threshold in the Hodgkin-Huxley nerve model

1007 GUTTMAN, RITA. Temperature characteristics of excitation in space-clamped squid axons

1019 ITO, SHIZUO, and HORI, NOBUAKI. Electrical characteristics of *Triturus* egg cells during cleavage

1029 LASSEN, ULRIK V., and CSÁKY, T. Z. Active transport of D-xylose in the isolated small intestine of the bullfrog

1043 BLAUSTEIN, MORDECAI P., and GOLDMAN, DAVID E. Competitive action of calcium and procaine on lobster axon. A study of the mechanism of action of certain local anesthetics

1065 PICKARD, BARBARA GILLESPIE, and THIMANN, KENNETH V. Geotropic response of wheat coleoptiles in absence of amyloplast starch

1087 LETTERS TO THE EDITOR

STROTHER, G. K. Absorption of *Musca domestica* screening pigment

NUMBER 6, PART 1, JULY 1966

1089 TANAKA, ICHIRO, and SASAKI, YUTAKA. On the electrotonic spread in cardiac muscle of the mouse

1111 STEINBACH, H. BURR. The sodium and potassium exchange between intact frogs and their environment

1125 BLUM, J. J. Phosphate uptake by phosphate-starved *Euglena*

1139 POLLACK, ROBERT E. Changes in leucine-specific sRNA after infection of *E. coli* by phages T2 and T4

1147 ASKARI, AMIR. Uptake of some quaternary ammonium ions by human erythrocytes

1161 BIBER, THOMAS U. L., CHEZ, RONALD A., and CURRAN, PETER F. Na transport across frog skin at low external Na concentrations

1177 BACH-Y-RITA, PAUL, and ITO, FUMIO. In vivo studies on fast and slow muscle fibers in cat extraocular muscles

1199 PAK, WILLIAM L., and EBREY, THOMAS G. Early receptor potentials of rods and cones in rodents

1209 KUHN, H. J., and MARTI, E. The active transport of oxygen and carbon dioxide into the swim-bladder of fish

1221 WILLIS, J. S. Characteristics of ion transport in kidney cortex of mammalian hibernators

1241 KONISHI, JIHEI. Fresh-water fish chemoreceptors responsive to dilute solutions of electrolytes

1265 VAN BREEMEN, CASEY, DANIEL, E. E., and VAN BREEMEN, DIANNE. Calcium distribution and exchange in the rat uterus

1299 VAN BREEMEN, CASEY, and DANIEL, E. E. The influence of high potassium depolarization and acetylcholine on calcium exchange in the rat uterus

1319 OZEKI, MASAHIRO, FREEMAN, ALAN R., and GRUNDFEST, HARRY. The mem-

brane components of crustacean neuromuscular systems. I. Immunity of different electrogenic components to tetrodotoxin and saxitoxin

1335 OZEKI, MASAHIRO, FREEMAN, ALAN R., and GRUNDFEST, HARRY. The membrane components of crustacean neuromuscular systems. II. Analysis of interactions among the electrogenic components

1351 LETTERS TO THE EDITOR
